

SureStep™ LH Ovulation Test

Be confident... Be definite... Be sure

SureStep™ LH is a simple test for the detection of LH in urine to aid the identification of the LH surge and predict ovulation. This information can be used to time intercourse and help achieve conception. SureStep™ LH identifies the LH surge in just 5 minutes.

SureStep™ LH gives rapid results with proven accuracy of 99%. It requires minimal training to use and has an inbuilt procedural control to show that the test has been performed correctly.
