2. Composition/information on ingredients

The Test strip contains dry reagents (mouse monoclonal anti-hCG antibodies, polyclonal goat anti mouse antibodies and polyclonal goat anti-HCG antibodies, buffers,) and is stored in a sealed foil pouch containing desiccant.

3. Hazards identification

Physiochemical Hazard: None

Health Hazard: Each strip contains sodium azide at a concentration of <0.02% (7.5ng/test), which is below the exempted limit of LD₅₀ 27mg/kg.

Environmental Hazard: None

4. First-aid measures

The pouched product is a plastic strip with only dry reagents being applied. Therefore, if the user comes in contact with the sample (Urine), they should follow normal personal hygiene measures.

5. Fire-fighting measures

Not Applicable

6. Accidental release measures

Not Applicable.

7. Handling and storage

Store at 2-30°C.

8. Exposure controls/personal protection

Use good laboratory practice, including laboratory gloves and safety glasses.

9. Physical and chemical properties

The strip consisting of an inert membrane and pad materials impregnated with chemical reagents in dry form are placed in a foil pouch containing desiccant. The product is odorless.

10. Stability and reactivity

Stable under conditions of use until the expiration date indicated on the corresponding label.

11. Toxicological information

Not Applicable

12. Ecological information

Not Applicable.

13. Disposal considerations

Waste material must be disposed of in accordance with federal, state and local regulations.

14. Transport information

Not Applicable.

15. Regulatory information

Not classified as hazardous according to EEC criteria.

16. Other information

The information contained in this document is believed to be correct, but does not purport to be all-inclusive and shall only be used as a guide. Innovacon shall not be held liable for any damage resulting from handling or contact with the above product.
